

March 13, 2021 - In addition, this is a complete offline installer from Artcut 2009 software, which is compatible with 32-bit and 64-bit Windows architecture. Also, it has support for Mac OS (10.3.9 or later) and Linux (Ubuntu 14.04.1 / 15.10 and later). For more information: <https://www.thinkaloud.com/blog/2017/08/27/tutorial-how-to-make-paper-cut-in-artcut/> I was looking for a way to do this on Mac where it doesn't seem to be supported. And while the installer works on Windows, it doesn't work on OS X. I found this error message which seems to indicate that the Mac installer is not working on OS X
